Repel Gel is a medium created to keep polymer clay from sticking to itself. This property makes it useful in many projects.

Repel Gel is ideal when creating luggage tags and picture frames.

Printed on the back of the fabric, the spiral pattern is visible when the fabric is held up to the light. This is a technique for creating a hidden design that only appears when the fabric is held up to the light.

We have seen how Repel Gel can be used to create a hidden design that only appears when the fabric is held up to the light. This is a technique for creating a hidden design that only appears when the fabric is held up to the light.
